

2015-2016

ELECTRONICS & COMMUNICATION

ACADEMIC YEAR 2015-2016

S1 ECE (2015 Batch)

Course code	Subject name
MA101	Calculus
PH100	Engineering Physics
BE10.104	Introduction to Electronics Engineering
CE100	Basics of Civil Engineering
BE110	Engineering Graphics
BE103	Introduction to Sustainable Engineering
PH110	Engineering Physics Lab
EC110	Electronics Engineering Workshop
CE110	Civil Engineering Workshop

S3 ECE (2014 Batch)

Sl.NO	Course code	Subject name	Staff handled
1	13.301	Engineering Mathematics I	Mr.Ambady
2	13.302	Signals & systems	Mr.Prajeesh
3	13.303	Network Analysis (TA)	Ms.Samitha
4	13.304	Analog Communicaions	Ms.Arathy
5	13.305	Electronics Circuits I (T)	Mr.Anoop
6	13.306	Digital Electronics (T)	Ms.Sony
7	13.307	Electronics Devices Lab (TA)	Ms.Samitha
8	13 .308	Electronics Circuits Lab (T)	Ms.Arathy

S5 ECE (2013 Batch)

Sl no	Course code	Subject name	Staff handled
1	13.501	Engineering Mathematics IV - Complex Analysis & Linear Algebra (ABHT)	Ms.Anjana
2	13.502	Engineering Management for Electronics Engineers (AT)	Ms.Ponnambili
3	13.503	Microprocessors & Microcontrollers (AT)	Mr.Ratheesh

4	13.504	Electronic Measurements & Instrumentation (T)	Ms.Sony
5	13.505	Applied Electromagnetic Theory (T)	Mr.Rahul
6	13.506.2	Fuzzy Systems & Applications	Ms.Arya
7	13.507	Communication Engineering Lab (T)	Mr.Sujith
8	13.505	Digital Signal Processing Lab (T)	Ms.Samitha

S7 ECE (2012 Batch)

Sl no	Course code	Subject name	Staff handled
1	08.701	Industrial Management (TA)	Mr.John
2	08.702	Optical Communication (T)	Ms.Gopika
3	08.703	Microwave Engineering (T)	Ms.Malu
4	08.704	Information Theory & Coding (T)	Ms.Preetha
5	08.715	Cryptography (TA)	Ms.Sony
6	08.736	MEMS (TA)	Ms.Sujith
7	08.707	Industrial Electronics Lab (T)	Mr.Praveen
8	08.708	Communication Systems Lab (T)	Mr.Sujith
9	08.709	Seminar (TA)	Ms.Malu
10	08.710	Project design	Mr.Anoop

EVEN SEMESTER

S2 ECE (2015 Batch)

Course code	Subject name	Staff handled
MA102	Differential Equations	Mr.Arun
CY100	Engineering Chemistry	Ms.Renju
BE100	Engineering Mechanics	Mr.Aravind
BE102	Design Engineering	Ms.Thushara
ME100	Basic Mechanical Engineering	Mr.Pratheesh
EE100	Basic Electrical Engineering	Mr.Smith
CY110	Engineering Chemistry Lab	Ms.Remju
EE110	Basic Electrical Engineering Workshop	Ms.Sneha
ME110	Mechanical Engineering Workshop	Mr.Soman

S4 ECE (2014 Batch)

Sl no	Course code	Subject name	Staff handled
1	13.401	Engineering Mathematics III	
2	13.402	Humanities (CTARFHD)	Mr.Rajan
3	13.403	Computer Organization & Architecture	Ms.Anuja
4	13.404	Digital Signal Processing	Ms.Anita
5	13.405	Computer Programming	

6	13.406	Analog integrated circuits(T)	Ms.Ponnambili
7	13.407	Digital integrated Circuits Lab (T)	Mr.Anoop
8	13.408	Analog Integrated Circuits Lab (T)	Ms.Ponnambili

S6 ECE (2013 Batch)

Sl no	Course code	Subject name	Staff handled
1	13.601	Image Processing (AT)	Ms.Arya
2	13.602	VLSI Design (T)	Ms.Malu
3	13.603	Control Systems (T)	Ms.Arathy
4	13.604	Digital Communications (T)	Mr.Rahil
5	13.605	Antenna & Wave Propagation (T)	Mr.Sujith
6	13.606.4	Professional Ethics	Dr.Mathew
7	13.607	Microcontroller Lab (T)	Ms.Arathy
8	13.608	Electronic Product Design & Mini Project (AT)	Ms.Malu

S8 ECE (2012 Batch)

Sl no	Course code	Subject name	Staff handled
1	08.801	Nanoelectronics (TA)	Mr.Viswajith
2	08.802	Radar & Television Engineering (T)	Ms.Preetha
3	08.803	Computer Communication (T)	Ms.Sreyas
4	08.804	Satellite & Mobile Communication (T)	Ms.Gopika
5	08.825	Microwave Devices & Circuits	Ms.Malu
6	08.816	Biomedical Engineering	Ms.Sony
7	08.807	Microwave & Optical Communication Lab (T)	Ms.Sony
8	08.808	Project (TA)	Mr.Anoop
	08.809	Viva – Voce (TA)	Mr.Prajeesh

COURSE OBJECTIVES AND COURSE OUTCOMES FOR

MA 101: CALCULUS COURSE

Sl.	Course Objectives	Subject Learning Outcomes or
------------	--------------------------	-------------------------------------

No.		Course Outcomes
		On completion of course the students will be able to:
1	To give the definition of an infinite series and explain what is meant by the sequence of partial sums. Relate the convergence or divergence of the series to the sequence of partial sums.	Evaluate the limit of a sequence of numbers (infinite series) and determine whether the series converges.
2	Compute partial derivatives of functions of several variables. Apply the theorem on mixed partial derivatives.	Understand the meaning of partial derivatives and calculate partial derivatives.
3	Use concepts of calculus to the model real-world problems	Compute dot product, cross product, length of vectors. Compute partial derivatives, derivatives of vector-valued functions, gradient functions.
4	Evaluate volumes of bounded solids and areas of bounded regions by using the ideas of double and triple integrals.	To change a double integral to polar coordinate. Compute (relatively simple) triple integrals
5	Apply the concept of line integral to work and circulation. Know the definition and properties of conservative vector fields and their relationship to gradient fields.	Determine if a vector field is conservative and find a potential function if conservative. Evaluate line integrals in the plane and in space, including line integrals of vector fields.
6		

COURSE OBJECTIVES AND COURSE OUTCOMES FOR

PH100: ENGINEERING PHYSICS COURSE

Sl. No.	Course Objectives	Subject Learning Outcomes or Course Outcomes
		On completion of course the students will be able to:
1	Dynamics of mechanical and electrical oscillation using Fourier series and integrals; time and frequency representations for driven damped oscillators, resonance; one-dimensional waves in classical mechanics and electromagnetism; normal modes.	Solve for the solutions and describe the behavior of a damped and driven harmonic oscillator in both time and frequency domains. Damped and Forced Oscillations oscillating system problems.
2	The fundamental principles of photonics that complement the topics in the optics and laser courses and to help students develop problem-solving skills applicable to real-world photonics problems.	Define and explain the propagation of light in conducting and non-conducting media.
3	Introduce basic concepts and principles of acoustics.	Define and explain the physics governing laser behaviour and light matter interaction in conducting and non-conducting media.
4		Apply wave optics and diffraction theory to a range of problems
5		Explain and calculate the physical effects of acoustic reflections, absorption, scattering, diffusion, diffraction, and propagation losses.
6		Use advanced theoretical, numerical, and experimental techniques to model and analyze acoustical elements in musical instruments, the human voice, room acoustics, and audio.

**COURSE OBJECTIVES AND COURSE OUTCOMES FOR
INTRODUCTION TO ELECTRONICS ENGINEERING COURSE**

Sl. No.	Course Objectives	Subject Learning Outcomes or Course Outcomes
		On completion of course the students will be able to:
1	To get basic idea about types specifications and common values of passive components.	Students can identify the active and passive components.
2	To familiarize the working and characteristics of diodes,transistors and MOSFETS.	Students can design and setup simple circuits using diodes and transistors.
3	To understand working of diodes in circuits and rectifiers.	Students are able to understand the characteristics of diodes and transistors.
4	To familiarize some measuring instruments.	Voltages and currents can be measured and monitored using electronic measuring instruments.

**COURSE OBJECTIVES AND COURSE OUTCOMES FOR
ME 102: ENGINEERING GRAPHICS COURSE**

Sl. No.	Course Objectives	Subject Learning Outcomes or Course Outcomes
		On completion of course the students will be able to:
1	Increase ability to communicate with people.	To hand letter will improve.
2	Learn to sketch and take field dimensions.	To perform basic sketching techniques will improve.
3	Learn to take data and transform it into graphic drawings.	To draw orthographic projections and sections.
4	Learn basic Auto Cad skills.	To use architectural and engineering scales will increase.
5	Learn basic engineering drawing formats	To produce engineered drawings will improve
6	Prepare the student for future Engineering positions	To convert sketches to engineered drawings will increase.

COURSE OBJECTIVES AND COURSE OUTCOMES FOR

CE 100: BASICS OF CIVIL ENGINEERING COURSE

Sl. No.	Course Objectives	Subject Learning Outcomes or Course Outcomes
		On completion of course the students will be able to:
1	To inculcate the essentials of civil engineering field to the students of all branches	The students will be able to illustrate the fundamental aspects of civil engineering
2	To provide the students an illustration of the significance of the civil engineering professions satisfying societal needs.	The students should able to plan a building
3		Students will be able to explain about surveying for making horizontal and vertical measurements.
4	.	They will able to illustrate the uses of various building materials and construction of different components of a building.
5		
6		

COURSE OBJECTIVES AND COURSE OUTCOMES FOR

BE 103: INTRODUCTION TO SUSTAINABLE ENGINEERING COURSE

Sl. No.	Course Objectives	Subject Learning Outcomes or Course Outcomes
		On completion of course the students will be able to:
1	To have an increased awareness among students on issues in areas of sustainability.	Able to appreciate and explain the different types of environmental pollution problems and their sustainable solutions
2	To have an insight into global environmental issues.	To be aware of problem related to global environmental issues
3	To establish a clear understanding of the role and impact of various aspects of engineering and engineering decisions on environmental, societal, and economic problems.	Able to apply the concepts of sustainability in their respective area of specialization
4	To understand the role of engineering in achieving sustainable world	To understand the need of waste disposal and management
5		
6		

COURSE OBJECTIVES AND COURSE OUTCOMES FOR

PH 103 : ENGINEERING PHYSICS LAB COURSE

Sl. No.	Course Objectives	Subject Learning Outcomes or Course Outcomes
		On completion of course the students will be able to:
1	Competency in an engineering or science profession via promotion to positions of increasing responsibility, publications, and/or conference presentations.	An ability to apply knowledge of mathematics, science, and engineering.
2	Adaptability to new developments in science and technology by successfully completing or pursuing graduate education in engineering or related fields, or participating in professional development and/or industrial training courses.	An ability to design and conduct experiments, as well as to analyze and interpret data.
3		An ability to identify, formulate, and solve engineering problems
4		Understanding of professional and ethical responsibility
5		The broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context
6		A recognition of the need for, and an ability to engage in life-long learning

**COURSE OBJECTIVES AND COURSE OUTCOMES FOR
EC 110 ELECTRONICS ENGINEERING WORKSHOP COURSE**

Sl. No.	Course Objectives	Subject Learning Outcomes or Course Outcomes
		On completion of course the students will be able to:
1	To gives the basic introduction of electronic hardware systems.	Students can identify the active and passive electronic components.
2	To provide hands on training with familiarization, testing, assembling.	Students get hands on assembling, dismantling and repairing systems.
3	To develop knowledge of electrical wiring and electronic circuits.	Drawing of electronic circuit diagrams using BIS/ IEEE symbols.
4	To use the various tools and instruments available in the Electronic Workshop.	Testing of electronic components (Resistor, Capacitor, Diode)
5		Assembling of electronic circuit / system on general purpose PCB.
6		

**COURSE OBJECTIVES AND COURSE OUTCOMES FOR
CE110 CIVIL ENGINEERING WORKSHOP COURSE**

Sl. No.	Course Objectives	Subject Learning Outcomes or Course Outcomes
		On completion of course the students will be able to:
1	To inculcate the essentials of civil engineering field to the students of all branches.	The ability to practice civil engineering using up-to-date techniques, skills, and tools as a result of life-long learning ability to design and conduct experiments
2	To provide the students an illustration of the significance of the civil engineering profession satisfying societal needs.	An ability to design a system or component to satisfy stated or code requirements of Civil Engineering.
3	To develop awareness about the instruments used in civil engineering field work.	The students will be able to illustrate the fundamental aspects of civil engineering
4	.	The students should able to plan a building

(s3)

**COURSE OBJECTIVES AND COURSE OUTCOME FOR
13.301: ENGINEERING MATHEMATICS II COURSE**

Sl.No.	Course Objectives	Course Outcomes
		On completion of the course the student will be able to
1.	This course provides students a basic understanding of vector calculus, Fourier series and Fourier transforms which are very useful in many engineering fields.	At the end of the course, the students will have the basic concepts of vector analysis.
2	Partial differential equations and its applications are also introduced as a part of this course.	At the end of the course, the students will have the basic concepts of Fourier series, Fourier transforms which they can use later to solve problems related to engineering fields.
3		At the end of the course, the students will have the basic concepts of Partial differential equations
4.		

**COURSE OBJECTIVES AND COURSE OUTCOME FOR
13.302 SIGNALS AND SYSTEMS**

Sl.No.	Course Objectives	Course Outcomes
		On completion of the course the student will be able to
1.	Understanding the fundamental characteristics of Signals and Systems	Classify systems based on their properties and determine the response of an LTI system using convolution

2	Understanding signals and systems in terms of both the time and transform domains, taking advantage of the complementary insights and tools that these different perspectives provide	Analyze the spectral characteristics of continuous time and discrete time periodic and aperiodic signals using Fourier analysis
3	Development of the mathematical skills to solve problems involving convolution, sampling and modulation	Analyze system properties based on impulse response and Fourier analysis
4.		Apply the Laplace transform and Z-transform for analysis of continuous time and discrete time signals and systems
		Understand the process of sampling and the effect of under sampling

**COURSE OBJECTIVES AND COURSE OUTCOMES FOR
NETWORK THEORY (13.303)**

Sl.No.	Course Outcomes	Subject Learning Outcomes Or Course Outcomes
		On Completion Of Course Student Will Be Able To:
1	To make the students capable of analyzing any given electrical network.	Learn the basic elements of networks , network topology, how to solve an electrical network,to simplify networks using theorems.
2	To study the transient response of series and parallel A.C. Circuits.	Learn to apply Laplace Transform in electronics circuits transient analysis & S-Domain analysis for analysis & application.
3	To study the concept of coupled circuits and two port networks	Learn the parameters of two-port network, coupled circuit resonance and application in electrical field.
4	To make the students learn how to synthesize an electrical network from a given impedance / admittance function	Learn the properties and Synthesis of R-L and RC networks by the Foster and Cauer methods
5		Discuss the transient analysis of RL, RC, and RLC networks.
6		Discuss the significance of Poles and Zeros, properties of

		driving point and transfer functions.
7		Explain the impedance, admittance, transmission and hybrid parameters.
8		Learn to synthesize an electrical network.

**COURSE OBJECTIVE AND COURSE OUTCOME FOR
13.304 ANALOG COMMUNICATION (2013)**

Sl no	Course Objective	Course Outcome
		On completion of course the student will be able to
1	To explain the various communication methods used in analog signal transmission using amplitude modulation method	Explicate various types of amplitude modulation methods in analog system , it's various parameters to determine it's performance
2	To create awareness on the noises that effect a communication system	Interpret the various types of noise in communication system
3	To explain the various communication methods used in analog signal transmission using angle modulation method	Discuss various types of frequency and phase modulation methods in analog system , it's various parameters to determine it's performance
4	To impart basic knowledge on public telephone systems.	Explained about the basic communication using telephone system and its basic loops and structures

COURSE OBJECTIVES AND COURSE OUTCOMES FOR

13.305: ELECTRONIC CIRCUITS

Sl No.	Course Objectives	Course Outcomes
1	To explain the basic wave shaping circuits	Design and analyze Linear and non-

		linear wave shaping circuits, its waveforms and characteristics.
2	To explain the DC analysis of BJT circuits	Design DC biasing circuits.
3	To develop the basic understanding of amplifier designing and its analysis using hybrid model	Explain classification of amplifiers and analyze the CE, CB, CC amplifiers using small signal hybrid model and derive the voltage gain, current gain, input impedance and output impedance.
4		Design and analyze different types of the MOS amplifiers and their frequency response by using the small signal model.
5	To make students aware of amplifier operation at high frequency and its frequency responses.	Acquired knowledge about transistor at high frequency.
6	To study and analyze the performance of negative as well as positive feedback circuits.	Analyze the use of feedback in circuits.
7	To study different oscillator circuits	Will be able to analyze and design oscillators
8	To make students aware timing circuits and sweep circuits	Design and analyze the sweep circuits
	To make students learn about different types of Power amplifiers.	Design and analyze different types of power amplifiers and compare them in terms of efficiency.
	To make students learn about different Power supply units.	Design a DC power supply.

**COURSE OBJECTIVES AND COURSE OUTCOMES FOR
13.306 DIGITAL ELECTRONICS**

Sl. No.	Course Objectives	Subject Learning Outcomes or Course Outcomes
		On completion of course the students will be able to:
1	To understand different positional number systems and conversions.	Compare various positional number systems and binary codes
2	To introduce basic postulates of	Apply Boolean algebra in logic circuit design

	Boolean algebra and show the correlation between Boolean expression	
3	To analysis and design various combinational circuits and sequential circuits	Design combinational and sequential circuits
4	To study the fundamentals of HDL	Design and implement digital systems using basic programmable blocks
5	To design and implement synchronous sequential circuits	Formulate various digital systems using HDL. Capability to deal with different logic families.
6	To study different logic families and their properties.	Design Mealy Moore machine systems.

COURSE OBJECTIVE AND COURSE OUTCOME FOR

13.307: ELECTRONIC DEVICES LAB

SI NO:	COURSE OBJECTIVE	COURSE OUTCOMES
1	Understand the nature and scope of modern electronics.,	Verify the working of diodes, transistors and their applications.
2	Describe physical models of basic components.	Build a common emitter/base/collector amplifier and measure its voltage gain.
3	Design and construct simple electronic circuits to accomplish a specific function	Study the characteristics of diodes,transistors ,FETs,SCR and UJT
4	Enable students to have the practical knowledge of different semiconductor electronic devices.	Get an idea about various RC circuits and zener regulator circuits.
5	To study the specifications of devices and circuits	

**COURSE OBJECTIVE AND COURSE OUTCOME FOR
13.308: ELECTRONIC CIRCUITS LAB**

SI NO:	COURSE OBJECTIVE	COURSE OUTCOMES
1	To study working of electronic circuits.	To study about differential amplifiers, power amplifiers, feedback amplifiers, cascade amplifiers etc...
2	To design the circuits as per the specifications	To study and compare different oscillators and multivibrators.
3	Students should have to acquire reasonable proficiency in the analysis and design of basic electronic circuits	Study the frequency response of tuned amplifiers
4	Introduction to SPICE and simulation of experiments	Students able to design the circuit and generate circuit layout using SPICE

(s5)

**COURSE OBJECTIVES AND COURSE OUTCOMES FOR
13.501 ENGINEERING MATHEMATICS – IV (COMPLEX ANALYSIS AND LINEAR
ALGEBRA)**

Sl. No.	Course Objectives	Subject Learning Outcomes or Course Outcomes
		On completion of course the students will be able to:
1	To introduce the basic notion in complex analysis such as Analytic Functions, Harmonic functions and their applications in fluid mechanics and differentiations and integration of complex functions ,transformations and their applications in engineering fields.	After successful completion of this course, the students master the basic concepts of complex analysis and linear algebra which they can use later in their career.
2	Many fundamental ideas of Linear Algebra are introduced as a part of this course. Linear transformations provide a dynamic and graphical view of matrix-vector multiplication. Orthogonality plays an important role in computer calculations.	

**COURSE OBJECTIVES AND COURSE OUTCOMES FOR
13.502 ENGINEERING MANAGEMENT FOR ELECTRONICS ENGINEERS COURSE**

Sl. No.	Course Objectives	Subject Learning Outcomes or Course Outcomes
		On completion of course the students will be able to:

1	To study and analyze the nature, purpose and domain of management in the industrial system	Able to understand and apply the basic principles of engineering management (planning, organizing, leading and controlling)
2	To understand the success factors of the industrial system. To understand about personal management, financial management.	Able to understand how to Recruit, Select, Train and provide Induction concepts and Techniques. Able to understand shares and debentures.
3	Introduce depreciation, Basic concepts of quality and Quality Control, Discuss about TQM and acceptance sampling	Analyze quality control and studied how to manage total quality. Analyse different depreciation concepts.
4	To know the performance of electronic circuits, working specifications, failure density curve, Reliability of system connected in series and parallel, failure rate calculations, maintainability, replacement	The factors influencing the dynamics of the industrial system, with the aim of creating conditions for permanent growth in productivity and efficiency, as a basis for improving the business quality of industrial systems.

COURSE OBJECTIVES AND COURSE OUTCOMES FOR

13.503 MICROPROCESSOR & MICROCONTROLLER COURSE

Sl. No.	Course objective	Subject Learning Outcomes or Course Outcomes
		On completion of course the students will be able to:
1	To understand the basic operating concepts of microprocessors and microcontrollers.	To learn the basics architecture, interfacing, assembly language programming of 8085 microprocessor.
2	To communicate with various devices using the microcontroller and microprocessor.	To understand the differences between microprocessor and microcontroller.
	To design and develop various microcontroller based systems.	To Learn the architecture, instruction set and assembly language programming of 8051 microcontroller.
4	To program the controller to make various peripherals work for specified applications.	To learn the basic concepts of using timers, interrupts, serial ports with 8051.
5		To Understand basics of peripheral interfacing (ADC, DAC, Stepper Motor, LCD, Keyboard, RTC) and their programming with 8051 microcontroller.
6		To learn the architecture, instruction set, interrupts of ARM processor. To learn the architecture of PIC microcontroller.

COURSE OBJECTIVES AND COURSE OUTCOMES FOR

13.504 Electronic measurements & instrumentation

Sl. No.	Course Objectives	Subject Learning Outcomes or Course Outcomes
		On completion of course the students will be able to:
1	To understand various measurements techniques available	Students will able to explain the working of various electronic instruments
2	To understand basic working of instruments used for instruments	Students will able to understand dynamic characteristics of instruments.
3	To study the different bridge circuits.	Students can get the concept of different bridge circuits
4	To understand errors in measurements.	Students will able to study instrument design techniques .
5	To get the applications of various instruments.	Students will able to understand the applications of different instruments

COURSE OBJECTIVES AND COURSE OUTCOMES FOR

13.505 APPLIED ELECTROMAGNETIC THEORY

SI NO	Course Objective	Subject Learning Outcomes or Course Outcomes
		On completion of course the students will be able to :
1	To impart knowledge on the basic concepts of electric and magnetic fields.	understand the basic concepts of electromagnetic theory

2	To educate scientifically about Maxwell equations and Poynting theorem.	signal transmission through wave guide and transmission lines
3	To become familiar with propagation of signal through transmission lines and waveguides.	
4	To become familiar with propagation of signal through transmission lines and waveguides.	

COURSE OBJECTIVES AND COURSE OUTCOMES FOR

13.506.2 Fuzzy Systems & Applications

Sl. No.	Course Objectives	Subject Learning Outcomes or Course Outcomes
		On completion of course the students will be able to:
1	Provide an understanding of the basic mathematical elements of the theory of fuzzy sets.	Be able to distinguish between the crisp set and fuzzy set concepts through the learned differences between the crisp set characteristic function and the fuzzy set membership function.
2	Provide an emphasis on the differences and similarities between fuzzy sets and classical sets theories.	Be able to define fuzzy sets using linguistic words and represent these sets by membership functions.
	Provide a brief introduction to fuzzy arithmetic concepts.	Know fuzzy-set-related notions; such as α -level sets, convexity, normality, support, etc.
4		Become capable of representing a simple classical proposition using crisp set characteristic function and likewise representing a fuzzy proposition using fuzzy set membership function.
5		Have acquired the ability of thinking differently and have become capable, when necessary, to apply a new thinking methodology to real life problems including engineering ones.
6		

COURSE OBJECTIVES AND COURSE OUTCOMES FOR

08.708 COMMUNICATION ENGINEERING LAB

Sl. No.	Course Objectives	Subject Learning Outcomes or Course Outcomes
		On completion of course the students will be able to:
1	To provide experience on design, testing, and analysis of few electronic circuits used for communication engineering.	Simulate & validate the various functional modules of a communication system.
2	To understand basic transmission concepts and to develop strong concepts in fundamentals.	Demonstrate their knowledge in base band signaling schemes through implementation of FSK, PSK and DPSK.
3		Apply various channel coding schemes & demonstrate their capabilities towards the improvement of the noise performance of communication system.

COURSE OBJECTIVES AND COURSE OUTCOMES FOR

DIGITAL SIGNAL PROCESSING LAB

Sl.No.	Course Outcomes	Subject Learning Outcomes Or Course Outcomes
		On Completion Of Course Student Will Be Able To:
1	Enable the students to explore the concepts of design, simulation and implementation of basic signals using MATLAB	Study the implementation of basic signals in MATLAB
2	Enable the students to explore the concepts of design, simulation and implementation of various operations in digital signal processing using MATLAB	Implement the convolution operations in MATLAB
3	Familiarize with the DSP kit	Understand the implementation of FIR and IIR filters in MATLAB
4	Implement the basic operations of DSP using kit	Familiarize the properties and architecture of DSP processor kit TMS320C6713
5		Implement the basic DSP operation in DSP kit

(s7)

**COURSE OBJECTIVES AND COURSE OUTCOMES FOR
08.701 INDUSTRIAL MANAGEMENT COURSE**

Sl. No.	Course Objectives	Subject Learning Outcomes or Course Outcomes
		On completion of course the students will be able to:
1	Assume managerial and leadership roles in their chosen professional careers while working in multidisciplinary teams.	perform the Management Functions.
2	Engage in continuous learning by seeking out opportunities for higher education or ongoing training related to their employment.	compare selected Theories of Management.
		perform the functions in the Marketing Mix
4		use basic Business Application Software.
5		assess ethical issues in Business situations.

**COURSE OBJECTIVES AND COURSE OUTCOMES FOR
OPTICAL COMMUNICATION COURSE (08.702)**

Sl.No.	Course Outcomes	Subject Learning Outcomes Or Course Outcomes
		On Completion Of Course Student Will Be Able To:
1	To understand the basics of fibers, losses in fibers, types and principle of optical sources and detectors	Learn the basic elements of optical fiber transmission link, fiber modes configurations and structures

2	To know the receiver and amplifier structures, familiar with the design of optical communication link	Discuss the channel impairments like losses and dispersion
3	To recognise the multigigabit systems and soliton based systems.	Learn the various optical source materials, LED structures, quantum efficiency, Laser diodes
4		Learn the fiber optical detectors such as PIN APD diodes, noise performance in photo detector, receiver operation and configuration
5		Discuss the basic receiver structures and amplifier configurations
6		Apply the link and power budget analysis in the design of digital optical link.
7		Explain the components and principle of operation of WDM systems
8		Give the importance of soliton based systems and light wave networks in optical communication

**COURSE OBJECTIVES AND COURSE OUTCOMES FOR
08.703 MICROWAVE ENGINEERING**

Sl. No.	Course Objectives	Subject Learning Outcomes or Course Outcomes
		On completion of course the students will be able to:
1	Differentiate between conventional tubes and microwave tubes.	Develop the basic skills necessary for designing a wide variety of practical microwave components.
2	Explain the principle of microwave amplifiers and oscillators and analyze their parameters.	Evaluate the fundamental parameters of microwave solid state devices.

3	Describe the principle and characteristics of microwave solid state devices.	Understand important and fundamental microwave engineering parameters and terminology
4	Discuss advantages of microwave communication systems\.	Identify the types of repeaters and different FM microwave radio stations.

**COURSE OBJECTIVES AND COURSE OUTCOMES FOR
08.704 INFORMATION THEORY AND CODING COURSE**

Sl. No.	Course Objectives	Subject Learning Outcomes or Course Outcomes
		On completion of course the students will be able to:
1	To give a basic idea about the information theory.	This course enables the student to get idea about the information content of the message according to various application and its calculation
2	To get a knowledge about various coding schemes.	This course enables the students to design a lossless transmission system on the basis of channel capacity and source coding theorem
		The course makes the students aware about the noise present in communication channels and how it is affecting to corrupt the code and how it can be corrected
4		The students are introduced about the advanced coding techniques
5		The students can understand about coding techniques for data compression.
6		

COURSE OBJECTIVES AND COURSE OUTCOMES FOR

08.715 Cryptography

Sl. No.	Course Objectives	Subject Learning Outcomes or Course Outcomes
		On completion of course the students will be able to:
1	To understand the mathematical concepts of various Encryption	account for the cryptographic theories, principles and techniques that are used to establish security properties
2	To discuss authentication and digital signature algorithms.	mathematical concepts of various Encryption.
3	To study the design of different general purpose and application specific security Protocols and standards.	authentication and digital signature algorithms.
4		design of different general purpose and application specific security Protocols and standards.

COURSE OBJECTIVES AND COURSE OUTCOMES FOR

08.736 MEMS

Sl. No.	Course Objectives	Subject Learning Outcomes or Course Outcomes
		On completion of course the students will be able to:
1	Introduction to MEMS and micro fabrication	Be familiar with the important concepts applicable to MEMS, their fabrication.
2	To study the essential material properties	Be fluent with the design, analysis and testing of MEMS.
3	To study various sensing and transduction technique	Apply the MEMS for different applications.
4	To know various fabrication and machining process of MEMS	Analyze the engineering science and physics of MEMS devices at the micro-scale including: electrostatics, thermodynamics, piezoresistive, piezoelectric, magnetism, microfluidics, and

		optics.
5	Applications of microsensors and microactuators	Identify situations where MEMS sensors and actuators would be ideal for application to various products.
6	Getting access to fabrication and testing in academia and industry	

**COURSE OBJECTIVES AND COURSE OUTCOME FOR
08.707 INDUSTRIAL ELECTRONICS LAB**

Sl.No.	Course Objectives	Course Outcomes
		On completion of the course the student will be able to
1.	Design and test inductor-based circuits	Design inductors, transformer primary and secondary windings and test them
2	Design various gate drive circuits	Design and implement the power BJT and MOFET based gate driver circuits
3	Implement different relay control circuits	Design and implement temperature controlled and light controlled ON/OFF relay circuits
4.	Design firing circuits and PWM generators	Design and implement Sine Triangle PWM generator and linear ramp firing circuits
5.	Implement different types of converters and inverters	Design and implement step-up and step-down converters and push-pull inverters
6.	Implement different applications of SCR	Design and implement electronic dimmer circuit and battery charging circuit using SCR

\

COURSE OBJECTIVES AND COURSE OUTCOMES FOR

08.708 COMMUNICATION SYSTEMS LAB

Sl. No.	Course Objectives	Subject Learning Outcomes or Course Outcomes
		On completion of course the students will be able to:
1	To provide experience on design, testing, and analysis of few electronic circuits used for communication engineering.	Simulate & validate the various functional modules of a communication system.
2	To understand basic transmission concepts and to develop strong concepts in fundamentals.	Demonstrate their knowledge in base band signaling schemes through implementation of FSK, PSK and DPSK.
3		Apply various channel coding schemes & demonstrate their capabilities towards the improvement of the noise performance of communication system.

COURSE OBJECTIVES AND COURSE OUTCOMES FOR

08.709 SEMINAR

Sl. No.	Course Objectives	Subject Learning Outcomes or Course Outcomes
		On completion of course the students will be able to:
1	To identify various real world problems.	Collect, organize and analyse information about emerging technologies/ market demands/ current trends.
2	To develop and enhance leadership skills.	Demonstrate interpersonal skills.
3	To improve communication skills, presentation skills and other soft skills.	Awareness in keeping in with view new innovations and inventions.
4	To improve the stage courage and confidence.	
5	To set the stage for future recruitment by potential employers.	
6		

**COURSE OBJECTIVES AND COURSE OUTCOMES FOR
08.710 PROJECT & viva - voce**

Sl. No.	Course Objectives	Subject Learning Outcomes or Course Outcomes
		On completion of course the students will be able to:
1	To introduce the students to various emerging fields in electronics and communication.	Exhibit the strength and grip on the fundamentals of the subjects studied in the previous semesters.
2	To provide an opportunity to exercise the creative and innovative qualities in group project environment,	An ability to utilise technical resources
3	To excite the imagination of aspiring engineers, innovators and technopreneurs.	An ability to write technical documents and give oral presentation related to work completed.
4	To have hands-on experience in the students related field so that they can relate and reinforce what has taught in the classroom.	Perform requirement analysis and identify design methodologies.

**(s4) COURSE OBJECTIVES AND COURSE OUTCOMES FOR
ENGINEERING MATHEMATICS -III
13.401 PROBABILITY & RANDOM PROCESSES**

Sl. No.	Course Objectives	Subject Learning Outcomes or Course Outcomes
		On completion of course the students will be

		able to:
1	To expose the students to the basics of probability theory and random processes essential for their subsequent study of analog and digital communication	Understand the axiomatic formulation of modern Probability Theory and think of random variables as an intrinsic need for the analysis of random phenomena.
2		Characterize probability models and function of random variables based on single & multiples random variables.
3		Evaluate and apply moments & characteristic functions and understand the concept of inequalities and probabilistic limits.
4		Understand the concept of random processes and determine covariance and spectral density of stationary random processes.

COURSE OBJECTIVES AND COURSE OUTCOMES FOR

13.402 HUMANITIES

Sl. No.	Course Objectives	Subject Learning Outcomes or Course Outcomes
		On completion of course the students will be able to:
1	To explore the way in which economic forces operate in the Indian Economy.	The students will be acquainted with its basic concepts, terminology, principles and assumptions of Economics.
2	The subject will cover analysis of sectors, dimensions of growth, investment, inflation and the role of government will also be examined.	It will help students for optimum or best use of resources of the country.
3	The principle aim of this subject is to provide students with some basic techniques of economic analysis to understand the economic processes with particular reference to India.	It helps students to use the understanding of Economics of daily life.●
4	To give basic concepts of book keeping and accounting	The students will get acquainted with the basics of book keeping and accounting.

COURSE OBJECTIVES AND COURSE OUTCOMES FOR

13.403 COMPUTER ORGNISATION AND ARCHITECTURE

Sl. No.	Course objective	Subject Learning Outcomes or Course Outcomes
		On completion of course the students will be able to:
1	To impart knowledge in computer organization and architecture	To understand the functional units of computer. To understand the basics of Von-Neumann, Harvard, CISC, RISC architecture and steps for executing a program.
2	To impart knowledge in machine language programming	To understand assembly instructions and machine level programming.
3	To develop understanding in different memory structures.	To learn computer arithmetic and to discuss addressing modes, instruction set, instruction format (General and MIPS.
4	To understand the characteristics and techniques involved with different types of memory.	To design the datapath and control unit of MIPS instruction set.
5		To learn various techniques used for memory management.
6		To learn the characteristics and techniques involved in different types of memory.

**COURSE OBJECTIVES AND COURSE OUTCOMES FOR
DIGITAL SIGNAL PROCESSING (13.404)**

Sl.No.	Course Outcomes	Subject Learning Outcomes Or Course Outcomes
		On Completion Of Course Student Will Be Able To:
1	Introduction to the principle, algorithms and applications of modern digital signal processing.	Learn the basic elements of digital signal processing frequency domain sampling, properties of DFT, FFT.
2	To study the design of FIR and IIR filters.	Discuss various methods to design IIR and FIR filters like window method, frequency sampling method , impulse invariance, bilinear transformation.
3	To give an understanding of essential DSP	Learn the Direct Form, Cascade

	structures and applications .	Form, parallel and Lattice Structure for FIR and IIR filters.
4	To demonstrate the importance of the subject to electronics engineering as practiced today.	Learn the quantization noise, round off errors, input and output quantization error, limit cycles in IIR filters, round off errors in FFT algorithm.
5		Learn the programming tools for DSP processors.
6		Learn the applications of multi-rate signal processing- sub band coding, trans-multiplexers, computer architecture for signal processing.

**COURSE OBJECTIVES AND COURSE OUTCOMES FOR
13.405 COMPUTER PROGRAMMING COURSE**

Sl. No.	Course Objectives	Subject Learning Outcomes or Course Outcomes
		On completion of course the students will be able to:
1	To provide strong foundation in programming and in C++	After successful completion of the course, the students will have the confidence and knowledge to write useful, complex and multifunction programs.
2		Students will learn the concept of fundamentals of Computer, Arithmetic & logic gates, Assembly language, high level language, compiler and assembler and operating systems , Algorithm & flow chart.
		Students will learn the concept of C character set identifiers and keywords, data type & sizes, variable names, declaration, statements
4		Students will learn the concept of Flow of Control and program Structures

COURSE OBJECTIVES AND COURSE OUTCOMES FOR

13.406 ANALOG INTEGRATED CIRCUITS COURSE

Sl. No.	Course Objectives	Subject Learning Outcomes or Course Outcomes
		On completion of course the students will be able to:
1	To understand the basic principles of analog integrated circuits. To equip the students with a sound understanding of fundamental concepts of operational amplifiers.	Infer the DC and AC characteristics of operational amplifiers and its effect on output and their compensation techniques.
2	To understand some applications of analog integrated circuits. To know the diversity of operations that the op amp can perform in a wide range of applications.	Elucidate and design the linear and non-linear applications of an opamp and special application ICs.
3	To understand the basic principles of integrated circuit fabrication	Able to design and analyze filters, oscillators and multivibrators using special application IC 555 and general purpose opamp.
4	To study the different types of ICs and its applications.	Able to design, classify and comprehend the working principle of data converters. Able to design Voltage regulators, PLL and its application in communication

COURSE OBJECTIVE AND COURSE OUTCOME FOR

13.407: DIGITAL INTEGRATED CIRCUITS LAB

Sl NO:	COURSE OBJECTIVE	COURSE OUTCOMES
1	To familiarise various types of Digital ICs.	Study and realization of functions using basic and universal gates
2	To assemble digital circuits using ICs and study the performance	Realization of combinational circuits and sequential circuits

3	Acquire the basic knowledge of digital logic levels	Realization of code converters ,synchronous and asynchronous counters
4		Realization of Astable & Monostable multivibrators and various flip flops
5		Simulation using VHDL –simple arithmetic circuits, flip flops and counters

**COURSE OBJECTIVE AND COURSE OUTCOME FOR
13.408:ANALOG INTEGRATED CIRCUITS LAB**

SI NO:	COURSE OBJECTIVE	COURSE OUTCOMES
1	The capability to design and construct circuits, take measurements of circuit behavior and performance, compare with predicted circuit models and explain discrepancies.	Familiarization of Op-amp and its frequency responses,
2	To enable the students to have the practical knowledge of different analog ICs.	Astable, Monostable and Schmitt trigger circuit using Op -Amps. Triangular and square wave generators using Op- Amplifier
3	To study the specifications of ICs and to design circuits using ICs.	Difference Amplifier and Instrumentation amplifier
		Able to design and implement analog circuits

**COURSE OBJECTIVES AND COURSE OUTCOMES FOR
IMAGE PROCESSING (13.601)**

Sl.No.	Course Outcomes	Subject Learning Outcomes Or Course Outcomes
		On Completion Of Course Student Will Be Able To:
1	To understand the fundamentals of image processing and various transforms used in image processing	Learn the basic elements of image processing and various image transforms.
2	To study image processing techniques like image enhancement and image restoration.	Discuss spatial domain methods and frequency domain methods of image enhancement and degradation model for restoration..
3	To study image processing techniques like image segmentation and image representation.	Learn the lossless and lossy compression, point, line and edge detection, descriptors..
4	To study morphological image processing.	Discuss different morphological operations.
5		Discuss image processing applications, DFT,DCT, Walsh, Hadamard, transforms
6		Learn the histogram equalization technique, homomorphic filtering.
7		Learn the elements of Information theory ,dilation erosion.

**COURSE OBJECTIVES AND COURSE OUTCOMES FOR
13.602 VLSI DESIGN**

Sl. No.	Course Objectives	Subject Learning Outcomes or Course Outcomes
---------	-------------------	--

		On completion of course the students will be able to:
1	Explain device physics of MOS transistor, challenges in device scaling to submicron regime and short channel effects.	Be familiar with the important concepts applicable to CMOS chip, their fabrication.
2	Identify state of the art in unit processes to fabricate CMOS chip and develop an idea on the environmental impacts of the processes.	Apply the CMOS dynamic logic for different applications.
3	Explain the characteristics of CMOS inverters and design static and dynamic logic using CMOS.	Be fluent with the design, analysis and testing of CMOS IC.
4	Design data path elements like adders and multipliers in different algorithms, memory elements like RAM, ROM, PLAs.	Analyze the design of data path elements including: algorithms, memory elements.
5	Draw stick diagram and layout of inverters and gates.	Distinguish between different test generation methods and explain reliability aspects of VLSI circuits.
6	Distinguish between different test generation methods and explain reliability aspects of VLSI circuits.	How to draw stick diagram and layout of inverters and gates.

COURSE OBJECTIVE AND COURSE OUTCOME FOR

13.603 CONTROL SYSTEM (2013)

Sl no	Course Objective	Course Outcome
		On completion of course the student will be able to
1	To explain the modeling of the Control System using various methodologies	Discuss various types of system ,to find the response ,find the error, to design the system

		and know its response
2	To find the various time domain representation and find its response	Explained various types of time domain representation methods and to find whether it works on controlled basis
3	To find the various frequency domain representation and find its response	Explicate various types of frequency domain representation methods and to find whether it works on controlled basis
4	To design a lead or lag network And represent a system in state space	Interpret various state representation and test that help to design a control system in state space and in a controlled manner

**COURSE OBJECTIVES AND COURSE OUTCOMES FOR
13.604 DIGITAL COMMUNICATION**

SI NO	Course Objective	Subject Learning Outcomes or Course Outcomes
		On completion of course the students will be able to :
1	To understand the concept of Digital representation of analog source	Understand the concept of sampling and quantization
2	To introduce to various aspects of distortion less data transmission	Understand the concept of matched filtering and correlative coding
3	To have idea on geometrical representation of signals	Understand the idea of geometrical representation of signals
4	To compare Error performance of various band pass modulation techniques.	Understand the Error performance of various band pass modulation techniques
5		Understand the concept of Spread Spectrum communication

**COURSE OBJECTIVES AND COURSE OUTCOMES FOR
13.605 ANTENNA AND WAVE PROPAGATION**

Sl.	Course Objectives	Subject Learning Outcomes or
-----	-------------------	------------------------------

No.		Course Outcomes
		On completion of course the students will be able to:
1	To study various antennas, arrays and radiation patterns of antennas.	Understand important and fundamental antenna engineering parameters and terminology,
2	To learn the basic parameters of antenna and various antenna parameter measurements.	Learn the basic concepts of electromagnetic wave radiation and reception
3	To understand the radio wave propagation in the atmosphere	Develop the basic skills necessary for designing a wide variety of practical antennas and antenna arrays.
4	Introduce students to the various types and models of Radio wave propagation affecting Communication Systems. Introduction to Diversity principles..	Evaluate the fundamental parameters of antennas and arrays operating at various frequencies from LF to Microwave applications.
5	To improve the design and problem solving skills	Evaluate basic propagation models in mobile radio systems.
6		Identify the atmospheric and terrestrial effects on radio wave propagation

COURSE OBJECTIVES AND COURSE OUTCOMES FOR

13.606.4 PROFESSIONAL ETHICS COURSE

Sl. No.	Course Objectives	Subject Learning Outcomes or Course Outcomes
		On completion of course the students will be able to:
1	To create awareness on professional ethics for engineers. Professional ethics refer to a branch of philosophy in respect to human conduct, differentiating right from wrong and good from bad of such actions.	Able to Understanding Professional Ethics and Human Values , need for value education and self esteem, Human values, morals, values,respect for others, living peacefully .
	To instil human values and integrity. In every area of society, ethics play a	Able to understand the Ethics for Engineers and problems of environmental ethics in

2	major role in decision making. Personal integrity and ethical choices can influence a successful life and career. Integrity is a main essence of professionals.	engineering.
3	To respect the rights of others and develop a global perspective.	Able to understand the engineer's responsibility to environment, principles of sustainability , Sustainable development, Responsibility for safety and risk etc.
4	To study Professional rights and responsibilities , Intellectual Property Rights, ethical audit and procedure.	To work on design and development of protocols related to real-time communication.

**COURSE OBJECTIVES AND COURSE OUTCOME FOR
13.607 MICROCONTROLLER LAB**

SI NO	Course Objective	Subject Learning Outcomes or Course Outcomes
		On completion of course the students will be able to :
1	To understand fundamental operating concepts of microprocessors and microcontrollers	Students will get programming experiments using 8051 trainer kit.
2	To apply this knowledge to more advanced structures	Students will get fundamental idea about interfacing experiments
3	To understand low level programming	Students will get realization of boolean experiments using port.
4	To understand fundamental operating concepts of PIC microcontroller	Students will get fundamental idea of microcontrollers in engineering applications

**COURSE OBJECTIVES AND COURSE OUTCOMES FOR
13.608 ELECTRONIC PRODUCT DESIGN AND MINIPROJECT LAB**

Sl. No.	Course Objectives	Subject Learning Outcomes or Course Outcomes
		On completion of course the students will be able to:
1	Explain the stages of product development process.	Identify and decide the stages of product development process.
2	Predict the reliability of electronic products.	Design and construct reliable electronic products considering safety aspects.
3	Design electronic products considering safety aspects and hazardous environment.	Assemble electronic circuits using modern hardware after simulation the circuit.
4	Assemble electronic circuits using modern hardware after simulation the circuit.	
5	Construct products considering environmental safety and sustainable development.	

(s8)

**COURSE OBJECTIVE AND COURSE OUTCOME FOR
08.801:NANO ELECTRONICS**

SI NO:	COURSE OBJECTIVE	COURSE OUTCOMES
1	To study the basics of nano electronics and nano technology	Able to know the basics of nano electronics, impacts, limitations and methods of fabrications of nano materials, characteristic tools
2	Identify the significance of nano level fabrication of particles and layers and their characterization	Discuss trends in Microelectronics and Optoelectronics and basic properties of two dimensional semiconductor, Transport of charge in Nanostructures under Electric field and magnetic fields
3	Analyze nanoscale devices like SET, QW laser, CNT transistors, RTD etc	Explains Nanoelectronic devices and systems

**COURSE OBJECTIVES AND COURSE OUTCOMES FOR
08.802 RADAR AND TELEVISION ENGINEERING**

Sl. No.	Course Objectives	Subject Learning Outcomes or Course Outcomes
		On completion of course the students will be able to:
1	Identify the types of radars and different navigation systems.	Learn the basic concepts of radar modulator and radar receivers.
2	Explain the principle of colour TV systems and analyze their parameters.	Understand important and fundamental radar engineering parameters and terminology
3	Describe the principle and characteristics of digital TV and analyze their parameters.	Develop the basic skills necessary for designing a wide variety of practical radar components.

**COURSE OBJECTIVES AND COURSE OUTCOME FOR
08.825 MICROWAVE DEVICES AND CIRCUITS**

Sl.No.	Course Objectives	Course Outcomes
		On completion of the course the student will be able to
1.	Understanding the fundamental characteristics of Microwave network analysis	Apply tools like Scattering matrix and Signal flow graph in analyzing various microwave networks
2	To study different impedance matching techniques using lumped elements	Design single-stub, double-stub and quarter wave impedance matching networks using lumped elements
3	Understand the physics of various devices used at microwave frequencies	Explain the structure and working of microwave devices such as Gunn diode, IMPATT, TRAPPAT and MESFET
4.	Understand the of basic microwave amplifiers, oscillators and filter design	Design a single stage microwave amplifier, one-port negative resistance oscillator, low pass filters and band pass filters
5.	Understand the working of microwave passive devices	Explain the working of circulators and isolators and derive their S-matrix
6	Understand various components used in microwave integrated circuits	Design and analyze microwave planar transmission lines such as micro strip line, coupled strip line and micro strip coupled lines
		Design various distributed and lumped elements in microwave circuits

**COURSE OBJECTIVES AND COURSE OUTCOMES FOR
08.816 BIOMEDICAL ENGINEERING**

Sl. No.	Course Objectives	Subject Learning Outcomes or Course Outcomes
		On completion of course the students will be able to:
1	To know the Origin of Bioelectric potential and their measurements using appropriate electrodes and Transducers	Design instruments useful to the medical community
2	To understand how to measure various biochemical and nonelectrical parameters of human system	Evaluate alternate assumptions, approaches, procedures, tradeoffs, and results related to engineering and biological problems.
3		Design a variety of electronic and computer based devices

4	Design software for biomedical instrumentation, medical imaging, physiological measurement.
----------	---

**COURSE OBJECTIVES AND COURSE OUTCOMES FOR
08.803 COMPUTER COMMUNICATION**

Sl. No.	Course Objectives	Subject Learning Outcomes or Course Outcomes
		On completion of course the students will be able to:
1	<ul style="list-style-type: none"> To educate concepts, vocabulary and techniques currently used in the area of computer networks. 	Identify the OSI and TCP/IP layers and their tasks. Distinguish between the OSI reference and the TCP/IP suite of protocols. Interpret and explain physical, logical and port addresses.
2	<ul style="list-style-type: none"> To master the terminology and concepts of the OSI model and the TCP/IP model. 	Delve into the application of analog medium like TV and Cable for data networks and computer communication and networking.
3	<ul style="list-style-type: none"> To be familiar with wireless networking concepts 	Discuss the data link layer of internet model and classify the various protocols in data link layer Inquire about issues related to framing, flow and error control
4		Discuss the problems and solutions associated with delivery and forwarding of packets.

**COURSE OBJECTIVES AND COURSE OUTCOMES FOR SATELLITE AND MOBILE
COMMUNICATION(08.804)**

Sl.No.	Course Outcomes	Subject Learning Outcomes Or Course Outcomes
		On Completion Of Course Student Will Be Able To:
1	To understand different satellite orbits ,launching methods and satellite link analysis	Able to calculate the orbital determination and launching methods
2	Introduction to mobile communication and mobile propagation, discuss the possible multiple access techniques	Design antennas to provide Uplink and Down link Frequency.
3	To discuss the CDMA techniques in cellular communication	Explain the cellular concepts and cellular system capacity improvement methods
4		Modelling the link power budget in mobile communication
5		Learn various multiple access techniques
6		Understand the CDMA technique in cellular environment
7		Discuss the importance of space diversity techniques and MIMO systems in mobile communication

**COURSE OBJECTIVES AND COURSE OUTCOMES FOR
08.807 Microwave & Optical communication lab.**

SI NO	Course Objective	Subject Learning Outcomes or Course Outcomes
		On completion of course the students will be able to :
1	To provide experience on design, testing, and analysis of few electronic devices and circuits used for microwave and optical communication engineering.	Understand the characteristics of GUNN diode, Reflexklystron, E-plane, H plane, Directional coupler etc
2		Understand the concept measurement of VSWR, Antenna pattern, Impedance, Dielectric Constant etc
3		Measure the relation between wavelength, frequency .
4		Understand the characteristics of laser diode, LED.
5		Study different losses of optical fibre communication.

**COURSE OBJECTIVES AND COURSE OUTCOMES FOR
08.808 PROJECT & VIVA-VOCE**

Sl. No.	Course Objectives	Subject Learning Outcomes or Course Outcomes
		On completion of course the students will be able to:
1	To introduce the students to various emerging fields in electronics and communication.	Exhibit the strength and grip on the fundamentals of the subjects studied in the previous semesters.
2	To provide an opportunity to exercise the creative and innovative qualities in group project environment,	An ability to utilise technical resources
3	To excite the imagination of aspiring	An ability to write technical documents and

	engineers, innovators and technopreneurs.	give oral presentation related to work completed.
4	To have hands-on experience in the students related field so that they can relate and reinforce what has taught in the classroom.	Perform requirement analysis and identify design methodologies.
